

DATA PROTECTION OFFICER

A Data Protection Officer (DPO) is not only critical to ensure your company's valuable assets are secure, but also a legal requirement for a vast number of organisations.

Requiring specialist data protection expertise, many have neither the in-house resources, nor the workload to justify a full-time DPO. Using a proven external provider can take away the headaches associated and save you time, effort, and money.

A DPO is a individual who independently advocates for quality care and use of personal information. The role of a DPO forms part of the General Data Protection Regulation (GDPR) and applies to all businesses that market goods or services to customers and collect data as a result.

The role of a DPO is defined in Article 39 of the GDPR:

- to inform and advise you and your employees about your obligations to comply with the UK GDPR and other data protection laws;
- to monitor compliance with the UK GDPR and other data protection laws, and with your data protection policies, including managing internal data protection activities; raising awareness of data protection issues, training staff and conducting internal audits;
- to advise on, and to monitor, data protection impact assessments;
- to cooperate with the ICO; and
- to be the first point of contact for the ICO and for individuals whose data is processed (employees, customers etc).

DPO AS A SERVICE

DPO as a Service (DPOaaS) is an offering that provides you with a highly experienced data protection professional as and when you need them.

Entirely tailored to your business need, utilising DPOaaS means that you mitigate risk, save money and use your resources most effectively.

Utilising an 'as a service' offering, means that you maximise your valuable business resources.

- **SAVE TIME** Experienced, qualified professionals that know their stuff.
- **SAVE EFFORTS** Your team focus on what they do best.
- **SAVE MONEY** Pay only for what you need - our experts are on hand as and when you need them.
- **SCALABLE SERVICE** Grows alongside your business requirements.

ONE COMPLIANCE DPOAAS

Our offering is designed to meet your organisational needs perfectly. It can include all required aspects as described in the GDPR, i.e.:

- Validation of your internal processes with regards to personal data held within your systems and applications;
- Document and advise on data processing activity in relation to the Data Protection Act;
- Assist in the creation of data protection business processes, i.e. Subject Access Requests (SAR), the right to erasure, etc;
- Help in the creation of written documentation to support data protection by design, and Records of Processing that underpin your organisation, operational procedures and best practice as a living document;
- Support in creating your global training requirements for data protection awareness;
- Pragmatically and commercially advise on prioritisation and potential risk, data retention & data management best practice;
- Validate on-boarding processes for data protection impacted services, ensuring your company has the right framework to demonstrate due diligence;
- Keep the company updated in relation to the DPA and apply updates successfully to your organisation's unique environment. Direct any changes required to meet obligations and effectively document such efforts; and
- Create & support an internal audit programme to monitor ongoing compliance with the DPA, including reporting requirements to the board.
